Projects

Tata Group Data Visualization Job Simulation | Forage — Python, SQL, MySQL, Power BI

- Cleaned and analysed **541K+ online retail records** with **Python/Pandas** and **MySQL**, then built a multi-page **Power BI dashboard** to track **$10.6M+ in sales** and compare revenue trends, products, and country-level performance.

Customer Analytics Dashboard | Python, SQL, Power BI

- Cleaned **3.9K+ customer records** with **Python/Pandas**, imputed missing review ratings, and engineered age-group and purchase-frequency features; built a **Power BI KPI dashboard** showing **$59.76 average purchase value**, **3.75 average review rating**, and **Clothing as the top category ($104.3K)**.

Car Sales Dashboard | Power BI, Python

- Analysed **23.9K+ vehicle records** and identified **SUVs as the top body style ($170.6M in sales value)**; built an interactive **Power BI dashboard** with slicers and drill-downs to compare performance by company, model, transmission, and dealer region.

Sales Analysis Dashboard | Microsoft Excel (PivotTables, PivotCharts, Slicers)

- Analysed **14.3K+ customer-shopping records** and built an interactive **Excel dashboard** using **PivotTables, PivotCharts, slicers, and a map view** to track **$862.45K in total purchase value**; identified **Clothing as the top category ($384.95K)** and compared sales by season, age group, payment method, subscription status, and purchase frequency.
